KC432R

4 Door Fuzzies

C432R, C433R & Part of C467X set Rear Door outer fuzzie- 1965-67

These fuzzies originally had a 5" piece of plastic on one end. Some were held on at the end by a regular clip & some had just a screw at the very end. We cannot supply these fuzzies with the plastic but they will work fine with just the fuzzie material as we supplied them. If your plastic is still good & you want to look original you may be able to transfer the plastic.
